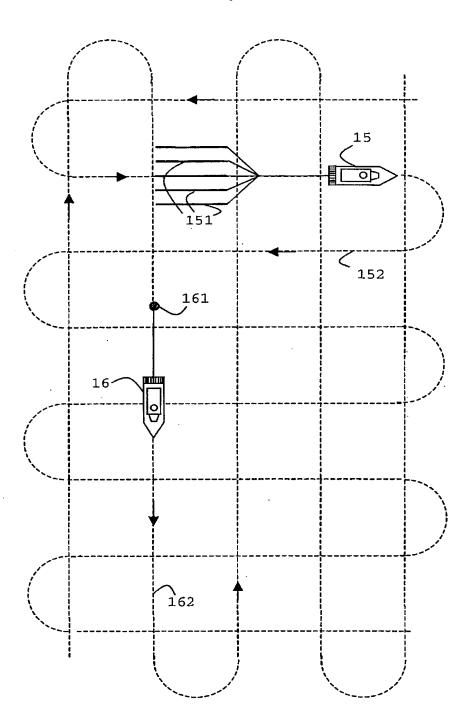

FIG. 1C

	<u> </u>
Obtaining multi-component acoustic signals from a crossline acquisition	
	<u> </u>
Calibrate to match geophone and hydrophone recordings	
	<u> </u>
Filter signals using a decomposition filter with 2D spatial components to obtain a decomposed data set	
	C ²³
Remove multiples from decomposed data set	
	24
Further processing/filtering using known methods	
	<u></u>
Imaging/Migration according to known methods
